

FIELD SERVICE

Acme Cryogenics' Field Service Team leads the industry in supporting all industrial gas applications and facilities. Committed to design, engineer and manufacture high quality systems, equipment and components for the industrial gas, medical gas and chemical industries. Safety is our highest priority, both for our employees and our products.

About Acme

Acme Cryogenics, based in Allentown, PA is a leading designer, manufacturer, and provider of precision-engineered products and field services for the production, distribution, and storage of cryogenic liquids and industrial gases.

Acme provides an extensive suite of products and services for customers across the entire industrial gas supply and distribution chain, in end markets such as food packaging, alternative fuels, pharmaceutical, cryobio, semiconductor, aerospace, medical gas and industrial gas industries.

The company has long-standing customer relationships due to its strong reputation and leading technical capabilities for customized systems and solutions as well as superior product quality.

Our Philosophy

As the equipment expert and total solutions provider for the industries we serve, we focus on:

- Offering our customers, the best value available through our single source solutions offerings
- Actively seeking customer input, listening to their needs, and adapting our offerings to exceed their requirements
- Maintaining the highest standards for product quality and customer service within our industries
- Ensuring product safety and social and environmental responsibility
- Operating with workplace safety as our highest priority
- Demonstrating integrity in our actions
- Promoting innovation among team members
- Ensuring consistency to encourage repeat business and grow long-term relationships

Our Technicians & Mangers

- Hold welding and brazing certifications
- Hold medical certifications for hospital and research installations
- Work with hazardous materials including hydrogen, LNG, and CNG
- Are vacuum experts, and can troubleshoot and solve complex issues
- Are trained and certified in health and safety procedures

Acme Cryogenics' global field service team can expertly perform field functions, assisting your staff in peak times, or providing a cost effective way to install and/or maintain your equipment. With a full compliment of highly trained and certified Technicians. Our staff is certified in accordance with NFPA and FDA cGMP guidelines.

Our Technicians & Mangers

- CGA Liquid Transfer Fittings And Related Parts
- Cryogenic Stainless Steel Globe Valves
- Industrial Final Line Manifolds
- Cylinder Fill Plant Equipment And Installation
- Electrical Systems Panels
- Gas Blending Equipment
- Medical Gas Delivery Systems
- Specialty Gas Cabinets And Components
- Vacuum-Insulated Fill Hoses
- Vacuum Jacketed Piping Design, Manufacture & Installation
- VJ Large Bore Pipe (Up To 36")
- Ultra High Purity Manufacturing For Electronics Industries
- Vaporizers
- Fabrication Services
- Micro Bulk Delivery Vehicle Repair Services
- Helium Container Repair

Services/Capabilities

- Assembly
- Brazing/Welding
- Cleaning/Finishing
- CNC Custom Machining
- Design/Engineering
- Field Installation and Repair
- Painting
- Polishing
- Quality Assurance Testing
- Repair: Cryogenic Storage Vessels
- Ultra High Purity (UHP) Fabrication
- Vacuum Pumping
- National Field Service

Custom Services

- Site Survey
- Equipment Sizing
- Capital Expenditure Calculation
- Logistic Services
- All Equipment & Services from one Source

Certifications

- ASME “U” Certificate of Authorization
- ISO Class 10 and 100 Cleanrooms
- DOT Registration Under Section 107.503 of Title 49
- DOT Registration as Manufacturer of Cylinders, 49 CFR 178.50
- National Board “R” Certificate of Authorization
- Quality System Audited to CSA B-51-03, Appendix H
- Transport Canada-Certificate of Registration
- UL and CSA Certification for Manufacture of Control Panels
- All welding and brazing procedures developed and qualified in accordance to ASME Section IX

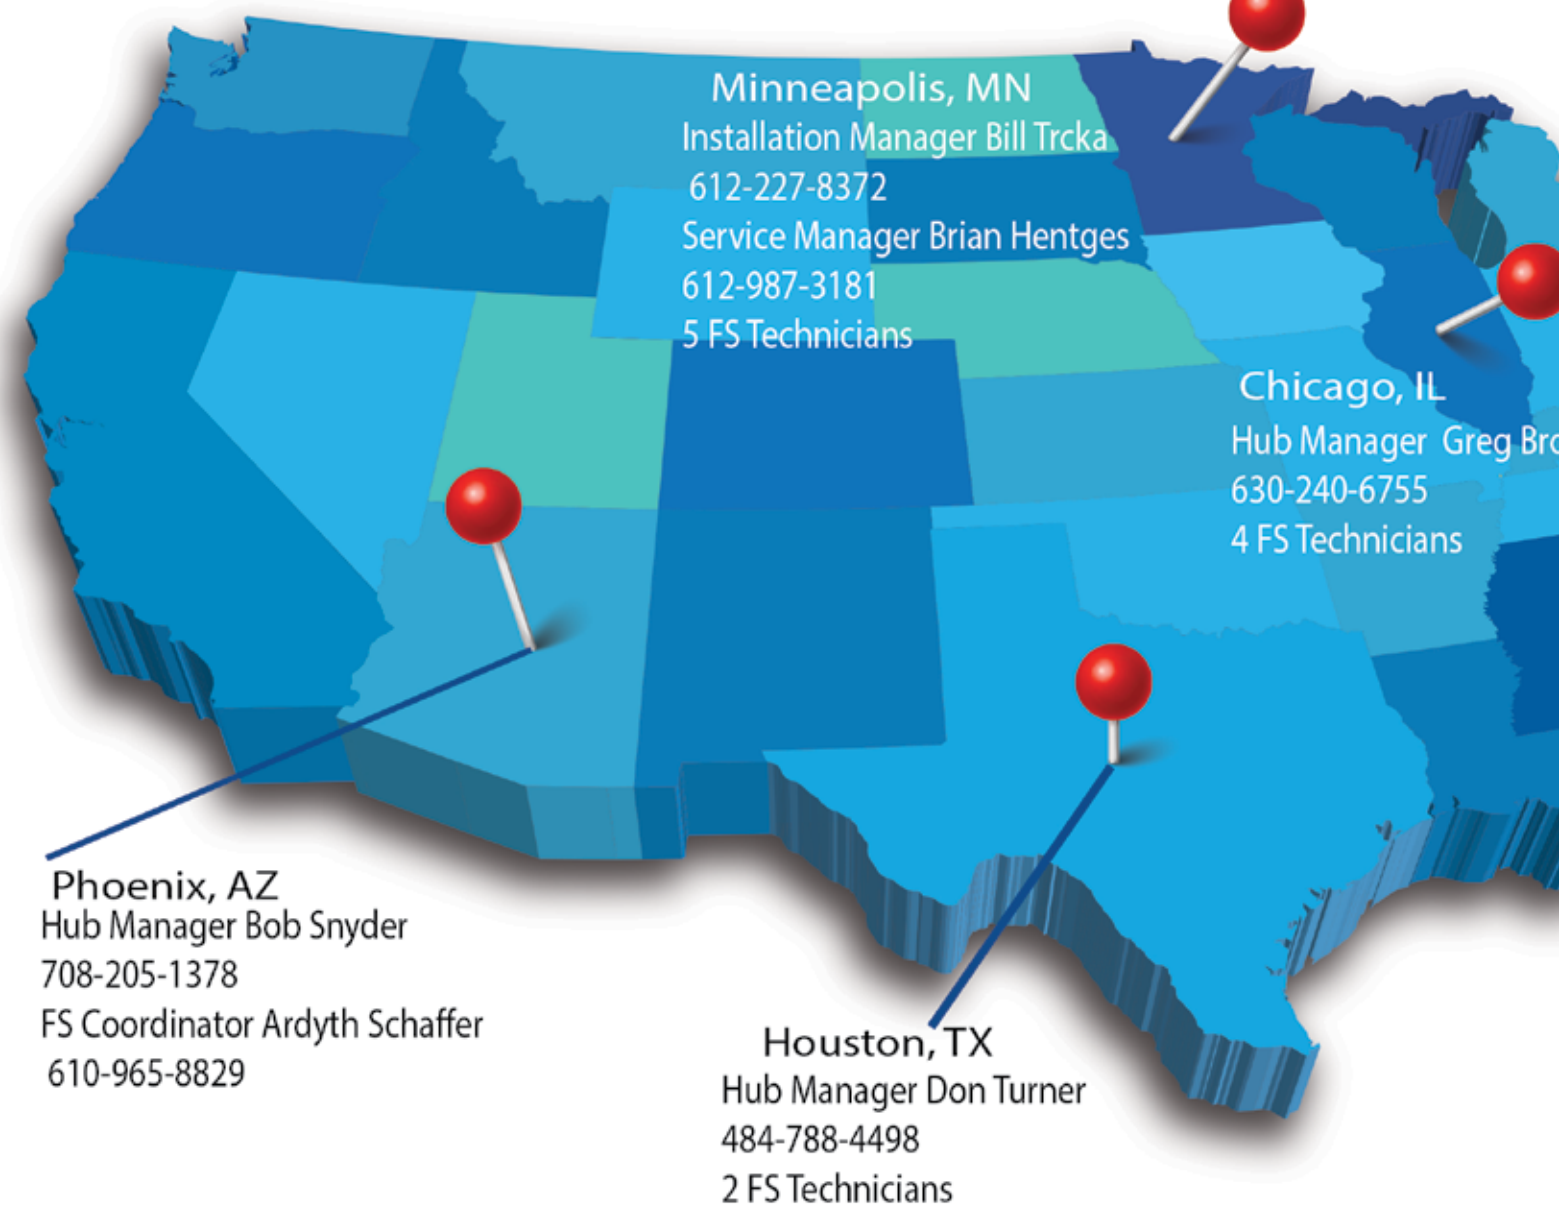

Proud Supporter of:

- Compressed Gas Association (CGA) (Member)
- Cryogenic Society of America (Corporate Sustaining Member)
- International Oxygen Manufacturer's Association (IOMA) (Member)
- Gases and Welding Distributors Association (Member)
- Independent Welding Distributors Cooperative Inc. (IWDC) (Member)

Service & Equipment
Distribution Hubs

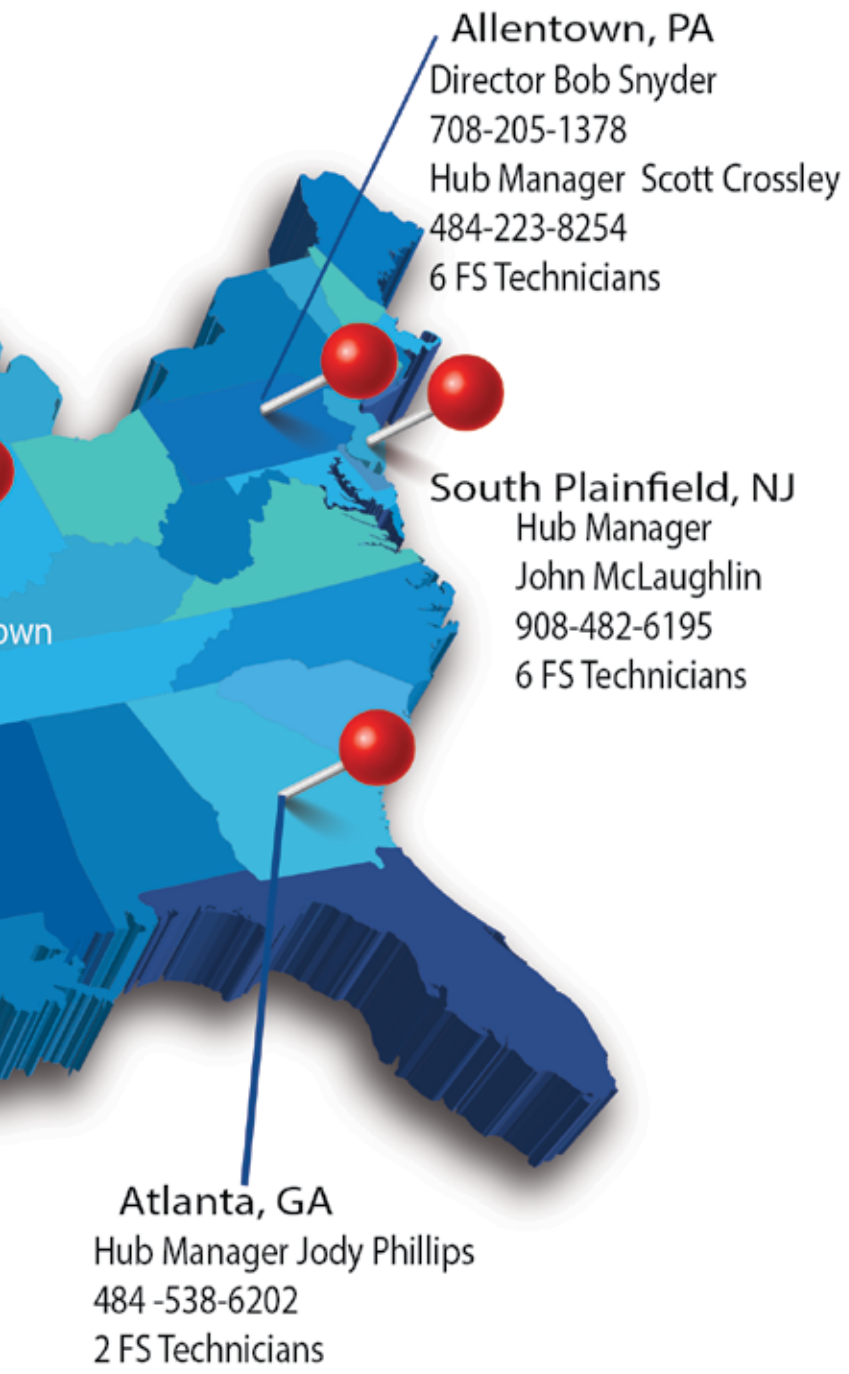

Minneapolis, MN
Installation Manager Bill Trcka
612-227-8372
Service Manager Brian Hentges
612-987-3181
5 FS Technicians

Chicago, IL
Hub Manager Greg Bro
630-240-6755
4 FS Technicians

Phoenix, AZ
Hub Manager Bob Snyder
708-205-1378
FS Coordinator Ardyth Schaffer
610-965-8829

Houston, TX
Hub Manager Don Turner
484-788-4498
2 FS Technicians

Techs & Managers are certified to health & safety procedures and are welding, brazing (medical gas) certified.
Trained to work with hazardous materials, are vacuum experts and can troubleshoot and solve complex design issues.
